Let's Get 'Appy: Helping Veterans Find Their Way

Project Title	Let's Get 'Appy: Helping Veterans Find Their Way
Project Summary	Develop an iOS and Android wayfinding app for our health care system
Country	United States

Project Description

The North Florida/South Georgia Veterans Health System includes 2 medical centers and 14 clinics. We are looking for motivated individual(s) who will develop a mobile app that will assist Veterans, staff, and visitors in finding their desired location for improved patient experience. The apps should incorporate Google maps, our facility website, pertinent COVID information and "Prepare for Your Visit" updates.

Required Skills or Interests

Skill(s)	
Coding	
Data visualization	
Design thinking	
Editing and proofreading	
Educational design	
Infographic design	
Software development	
Survey / polling design	

Additional Information

The Library Service of North Florida/South Georgia Veterans Health System supports clinicians and staff who strive to provide the highest level of patient care to our nation's Veterans. The completion of the projects described would accelerate our ability to provide a first class, user-friendly, and safe visit for our Veterans. Help

us serve those who have served. Information about our health system is available at https://www.northflorida.va.gov/.
